

We are pleased that *Scale Designs* was invited to make a presentation
on:

“Hopper Scales NTEP and Retrofits”

at the NISA (National Industrial Scale Association) Spring Conference
in Pittsburgh PA.

Mike Powers with Central Illinois Scale Company said Don did a great
job with his presentation.

I was not there but I can attest to the fact that Don never met an ear he
did not want to bend with his latest design, invention or idea about how
to feed the world.

He is currently spending a lot of time in Haiti trying to help Haitians
grow their own food instead of relying on imports and the charity of
others.

If your scale breaks, call us or have your dealer call us. We can get you
back in operation with a new scale faster than anyone else that we know
about. Typical delivery is about a week to ten work days but when all
our orders are for working replacement scales, we will attempt to replace
broken scales first and that can be pretty fast.
